

FOR IMMEDIATE RELEASE

## ***Promia Part of DARPA's \$30 mil National Cyber Range Phase 2 Award***

**San Francisco, CA – April 08, 2010** - The Defense Advanced Research Projects Agency (DARPA) has awarded Lockheed Martin Simulation, Training & Support Phase 2 of the National Cyber Range (NCR) program. NCR will provide an environment to develop, field and test new concepts and technologies to protect the United States against growing cyber threats. Promia is a subcontractor to Lockheed Martin providing cyber security knowledge, information assurance and application development expertise.

Promia developed in close cooperation with the U.S. Navy the Intelligent Agent Security Manager (IASM) network security appliance, which is now deployed at U.S. Department of Defense sites worldwide. "We are pleased to have the opportunity to apply Promia's resources to support this vital national security initiative," said Bill Reynolds, Promia's CTO. "We will be integrating and expanding on many innovative Promia and teammate technologies for a very compelling solution."

DARPA's National Cyber Range program is part of the Comprehensive National Cybersecurity Initiative (CNCI), a major government-wide effort to strengthen the nation's defenses against electronic attack. The NCR is a test bed consisting of computers and computer systems on which various cyber scenarios and systems can be evaluated to provide a comprehensive, unbiased assessment of the security of information and automated control systems.

### **About Promia Incorporated**

*Promia, Incorporated is a leading developer and supplier of security tools, based on open standard components with advanced analytic capabilities, to the energy sector, the banking sector, other Fortune 1000 companies and government markets. Its products are used in environments requiring high security, reliability, performance, and scalability. Based in San Francisco, Promia has offices in Princeton New Jersey, UC Davis, and Maryland.*

### **About Lockheed Martin**

*Headquartered in Bethesda, Md., Lockheed Martin is a global security company that employs about 140,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services.*
